Welcome to the Invasive Animal Cooperative Research Centre: Australia's largest integrated invasive animal research program.

The Invasive Animals CRC creates new technologies and integrated strategies to reduce the impact of invasive animals on Australia's economy, environment, and people. We concentrate on developing smarter tools to prevent and detect new invasions, advanced and tactical tools to strengthen integrated management strategies of carp and other pest fish, and new tools and integrated management strategies for major pests including foxes, wild dogs, feral pigs, rats and mice, cane toads, feral cats and rabbits.

The Australasian Vertebrate Pest Conference is our industry's premier event. Held every three years, it brings together researchers, managers, students and policy-makers dealing with pest animals.

[Lock 20-23 June 2011 into your diary, visit the conference website and register today.](#)
